### Winching

Demonstration & practice of rapid winching procedure.

Recovery a vehicle backwards up a steep slope by winching.

Self recover from lying on side using snatch block.

Speed-up Navi recovery techniques.

### Driving steep hills

Using Low First for descent and Low Second for ascent. Lower bullbar into bottom, select 2nd and drive and up hill,.

Side slope, use low first and place wheels in ruts. Turning on off-camber by completing turn before accelerating.

Clay surface & rutted hill climb, lower tyre pressure and use highest gear. Keep wheels in ruts!!

Difficult Hill Climb with loose surface and rocky ledges. Wheel placement critical and keep front wheels on ground.

### Driving steep rock faces.

Practice on smooth rock climb, correct wheel placement and minimal momentum.

Steep rock access. Rock jump up. Place wheels in "ramp" or "gap" in the rock and ensure rear of car aligned.

Descend over rock ledge, left wheels must be over diff. breaker rock in centre of gap and right wheels on side wall of large rock.

Traverse rock ledge and climb dirt bank with rock in centre. Then climb steep loose clay hill. .

### Driving rutted tracks

Rutted descent, VERY CAREFUL wheel placement.

Rutted ascent, accurate wheel placement

Timed SS. Steep rock face and loose rock climb. Probably winching.

**We require payment for a reservation of \$100 (non-refundable) by 19 Feb 2010. The balance must be paid by 5 Mar. 2010. Should you choose to pay the full amount of \$200 now and you have to withdraw, if we are notified by 5 Mar, we will refund \$100. There is no refund after 5 Mar. 2010.**
